NOTICE OF ALLOWANCE

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/6/2007 has been entered.

This is a Notice of Allowance in response to the Amendment filed with the RCE on 9/6/2007.

Claims 1-56 were previously pending in the Application.

Claims 7 and 30 are cancelled.

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d) to CANADA 2,414,632, filed 12/18/2002. The certified copy has been filed in parent Application No. 10/690,594 on 10/23/2003.

The drawings, Replacement Sheets 4-6 received on March 5, 2004, are acceptable.

Allowable Subject Matter

Claims 1-6, 8-29 and 31-56 are allowed. Claims renumbered 1-54.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior arts of record taken alone or in combination fail to teach, anticipate, suggest or render obvious a method and a memory test controller for collecting memory failure information in real time while performing a test of memory embedded in a circuit recited in the independent claims 1 and 41, as currently amended, including among other limitations, "transferring off-circuit the failure summary from the circuit under control of a second clock concurrently with uninterrupted testing of a next column or row in sequence".

Also, independent claim 32 recites among other limitations, "classifying the detected failure according to predetermined failure types, and updating a failure mask register with results of comparisons of memory outputs and expected memory outputs".

Furthermore, independent claim 56 recites among other limitations, "failure type identification means responsive to a failure mask for classifying detected failures according to predetermined failure types, and counter means responsive to outputs of said failure type identification means for counting failures of each the predetermined types".

Also, claim 55 recites among other limitations, "a failure type identification circuit for determining a failure type of each detected failure, a failure type counter for each of said predetermined failure type, and a failure mask register for storing results of comparisons between each memory output and corresponding expected memory outputs".

Consequently, Claims 1-6, 8-29 and 31-56 are allowed over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
